Professional Summary

B.Tech Computer Science and Engineering student at Vellore Institute of Technology (CGPA: 9.39) with strong foundations in Data Structures and Algorithms, backend development, software engineering, and AI integration. Currently working as an Undergraduate Intern at Dell Technologies, building Python, FastAPI, and Docker-based microservices, RAG pipelines, and scalable REST APIs for internal engineering workflows. Experienced in full-stack development, computer vision, and practical problem-solving for real-world software systems.

Technical Skills

- **Programming Languages:** Python, C++, Java, SQL
- **Backend & Web Development:** FastAPI, REST APIs, HTML, CSS, JavaScript, React.js, Node.js, Express.js
- **AI/ML & Computer Vision:** Retrieval-Augmented Generation (RAG), OpenCV, MediaPipe, Keras, NumPy, Pandas
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems
- **Tools & Technologies:** Docker, Docker Compose, Git, GitHub, VS Code
- **Concepts:** Microservices Architecture, Agile Development

Experience

- **Undergraduate Intern — Dell Technologies** June 2026 – Present
Client Solutions Group (CSG)
 - Developing Python-based FastAPI microservices for an AI-powered product support assistant used in internal engineering workflows.
 - Implementing Retrieval-Augmented Generation (RAG) pipelines to provide contextual assistance and automated error analysis.
 - Designing scalable REST APIs and containerizing services with Docker while collaborating in an Agile software development environment.

Education

- **Vellore Institute of Technology** Bhopal, India
B.Tech in Computer Science and Engineering (Core) — CGPA: 9.39 2023 – 2027
- **Army Public School** Gorakhpur, India
Class XII: 97% — Class X: 96.8%

Projects

- **TrendMind – AI Model Discovery Platform** [Link] 2025
MERN Stack (MongoDB, Express, React, Node.js)
 - Developed a full-stack MERN platform for discovering, comparing, and exploring trending AI models.
 - Implemented secure user authentication, REST APIs, and dynamic content rendering using React and Node.js.
 - Designed recommendation and filtering features to improve AI model discovery and usability.
- **Pose Perfect – AI Yoga Pose Detection System** [Link] 2024
Python, OpenCV, MediaPipe, Keras
 - Developed a real-time yoga pose detection system using OpenCV, MediaPipe, and Keras.
 - Trained a machine learning model achieving over 90% accuracy in classifying predefined yoga poses.
 - Implemented real-time posture analysis and corrective feedback with low-latency performance.

Certifications

- IBM — Web Development Fundamentals
- Google — Bits and Bytes of Computer Networking
- NPTEL — Introduction to Machine Learning
- Deloitte — Data Analytics Job Simulation
